WORK EXPERIENCE

Full Stack Developer

April 2021 - Present

Taskmo

Played a crucial role as the core member of the technical team. Responsible for developing flagship products for Taskmo with proven expertise in project management, coordination, and problem-solving.

- Led the creation of Fieldon by Taskmo, a foundational project that continues to streamline operations for the organisation.
- Ideated and developed an intuitive customer relationship management portal for clients to have a smart overview of the project in real-time.
- Successfully developed 50+ full-use portals for various external stakeholders and in-house teams working on client operations and reduced work redundancy by upto 80%.
- Ensured effective data management across in-house teams by creating exclusive dashboards and streamlined workflows.
- Mentored and lead a team equipping them to work on core functionalities of the organisation.
- Demonstrated strong project management skills, overseeing tasks and ensuring timely completion.

Full Stack Developer

Dec 2019 - January 2021

Cognitive Clouds

Holding a strong track record of working on multiple projects, including SYSTYM, Traksafety, and CHG.

- Developed backend functionalities for projects such as SYSTYM, Traksafety, and CHG.
- Utilized PostgreSQL, Node.js, Express.js, Ruby on Rails (ROR), and email templates.
- Ensured efficient database management and optimized backend performance.
- Collaborated with cross-functional teams to gather requirements and translate them into technical implementations.
- Conducted thorough testing and debugging to ensure the stability and reliability of backend systems.
- Actively stayed updated with industry trends and best practices to enhance backend development skills.

Canara Engineering College, Mangalore **2012-2016**

Secondary Education - PCMB

St. Aloysius College, Mangalore **2010-2012**

AWARDS

Star Performer **2021-2022**

Highest Contributor (Fresher) **2017-2018**

OTHER PROJECTS

Khoka

 [Khoka-Web App](#)

 [Khoka](#)

Khoka is an online rental bike booking platform, that is solely designed for students to use rental bikes for their commute at affordable rates.

Netflix Clone

 [Dashboard](#)

A project made for practice and to show my ability to create a flexible application that adapts the UI changes. The dashboard has been implemented in a similar way to the original application. React, Redux and other API's are used in this project.

Thishi Events

 [Website](#)

A project made for practice to show my abilities into building a fully dynamic yet interactive website. Next.js and other API's were used in this project.

INTERESTS

Content Editor

Feb 2017 - June 2019

DAZN

Responsible for management content editing and placement and ensure that content adhered to the given guidelines and maintaining coordination across cross functional teams.

- Managed content placement on the company's website using the in-house CMS tool.
- Ensured accurate and precise content positioning based on given specifics.
- Maintained consistency, quality, and adherence to content guidelines.
- Collaborated with cross-functional teams to meet content objectives.
- Conducted thorough quality checks to ensure error-free content placement.
- Actively stayed updated with industry trends and best practices in content management

PROJECTS

Client Resource Portal

I developed 40+ exclusive client portals that streamline project operations.

- The portal allowed clients to easily manage, track, and access the project standing in real-time.
- The portal was designed to enhance efficiency of the project and offers smart overview on the project in real-time.
- It allows clients and partners to view follow-up on leads, ensuring effective communication and issue resolution. enhancing efficiency while on the ground.
- Additionally, the application provided graphical representations of individual field partner productivity and incorporated features such as click-to-call functionality and the ability to export reports in Excel and PDF formats.
- This comprehensive solution maximized productivity upto 10x times and improved collaboration within the team.

Skills: [react-simple-maps](#) [react-csv](#) [react-apex-charts](#)

Internal Resource Dashboard

I developed 10+ robust platform that effectively represented leads for individual projects in a dynamic manner.

- The platform included advanced features to track the number of leads generated, the successful completion of quality checks, and the check-in status of field partners in various states.
- Additionally, I implemented strict access control measures to ensure secure access for both clients and the internal team. By leveraging this platform, project teams were able to efficiently monitor lead performance, maintain data integrity, and facilitate seamless collaboration.
- As a result, the platform significantly enhanced project management and overall productivity of internal teams up to 8x times.
